FARM / ORIGIN INFORMATION

Mixed Grower Lot

NZ Hops mixed grower lots bring together hops from three or more farms, blended to showcase the collective quality and consistency of our growers. Each lot meets all Hopmark certification standards, including strict oil and aroma benchmarks. The combination of hops grown across different soil types and microclimates creates a stronger, more complex expression of New Zealand hop character, delivering depth, balance, and reliability in every brew. Traceability information is available on request.
